Happy Hour Project Presentation

September 11, 2019

William, Rebekah, Sue, Brian, Wynton

Overall Concept and Motivation:

- The motivation behind this project was to create a working website that utilized the knowledge and skills we've acquired thus far in this course and to create a tool that people would enjoy using.

- Develop a tool for people to easily access cocktail recipes by the title of the cocktail and to store the recipe as their favorite if desired.
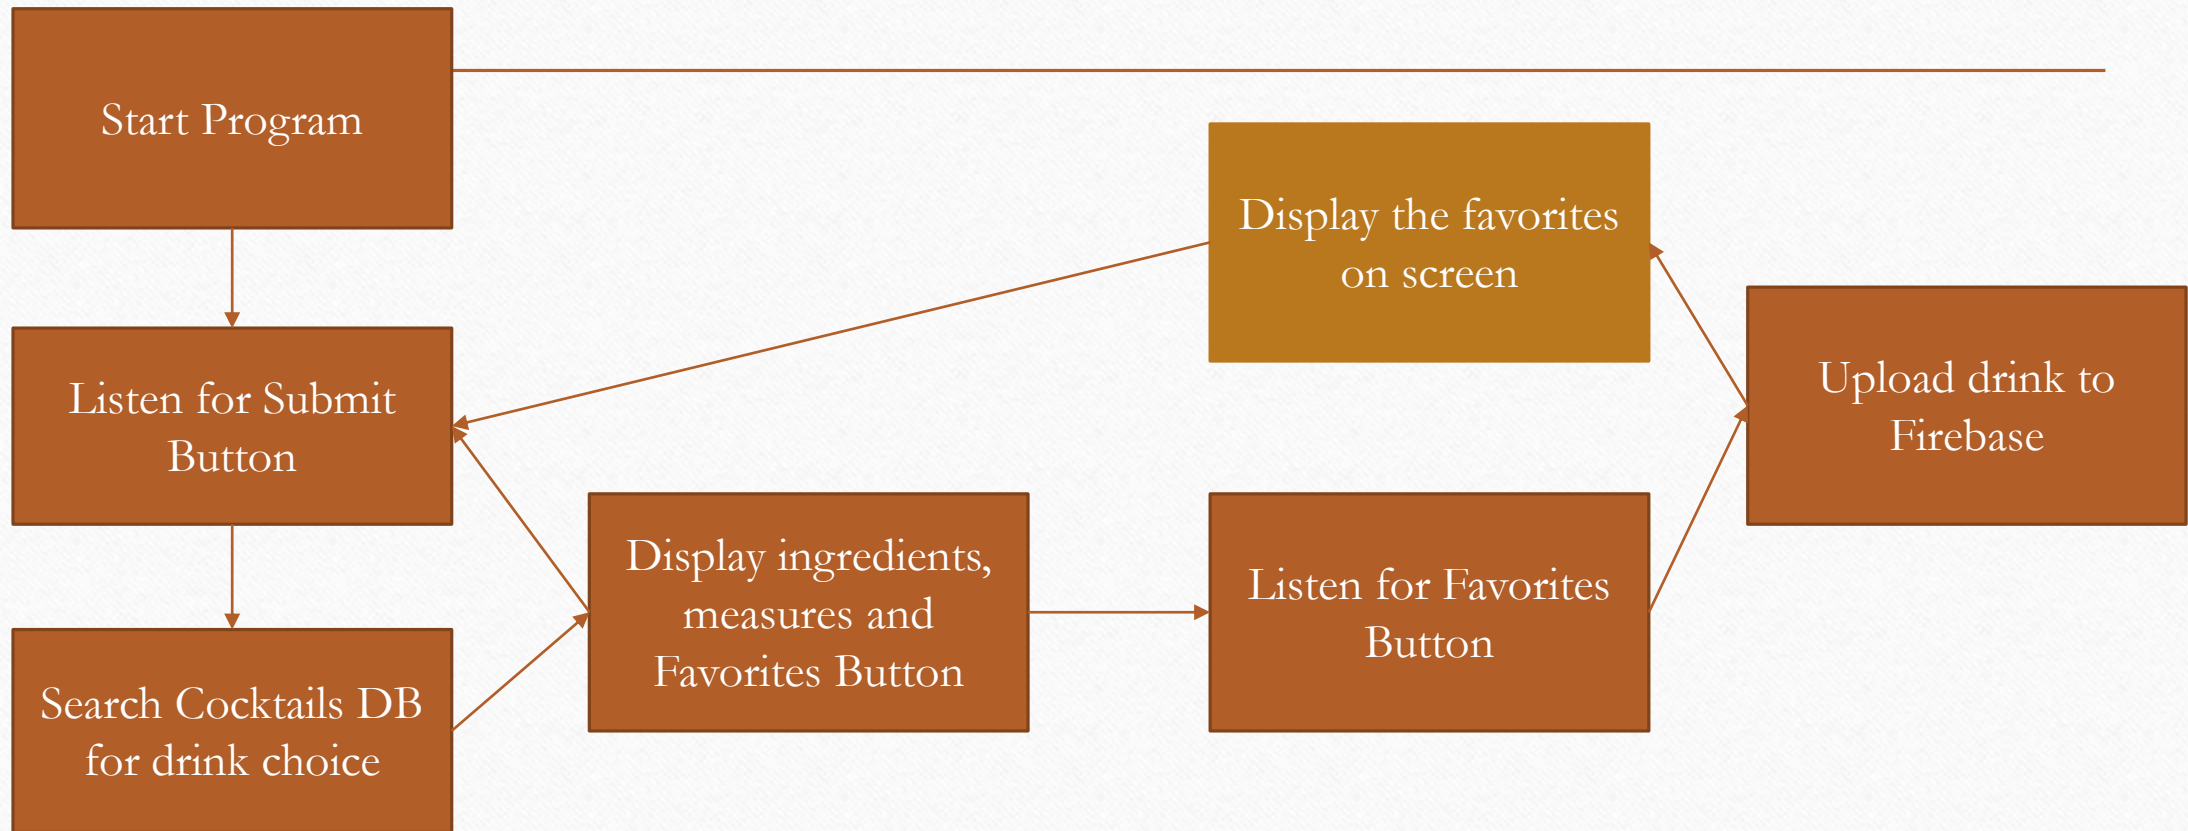

Technologies Used:

Firebase

HTML

CSS

jQuery

TheCocktailDB

JS

Happy Hour Design Process Diagram

Find Ingredients to your favoite cocktails

Search Cocktail here

submit

Happy Hour

Drink Recipe

Ingredients: Measures:

Future Developments:

- Create a more forgiving search experience by using auto fill or auto correction for misspelled searches.

- Pull up Happy Hour destinations near by using google maps.

- Add taxi option (Uber, Lyft etc.).

- Add a feature that allows the removal of unwanted favorites as well as duplicates.

- Add the age verification.

Project Requirements

Use at least two APIs.	✓
Use AJAX to pull data.	✓
Use at least one new library or technology that we haven't discussed.	✓
Create a polished front end/UI .	✓
Meet good quality coding standards (indentation, scoping, naming, etc.).	✓
Do NOT use alerts, confirms, or prompts (look into *modals*).	✓
Incorporate some sort of repeating element (table, columns, etc.).	✓
Use Bootstrap or an alternative CSS framework.	✓
Deploy your site to GitHub Pages.	✓
Include user input validation.	✓

Bonus

Utilize Firebase for persistent data storage. ✓

Make your site mobile responsive. ✓

Use an alternative CSS framework such as Materialize. ✓
